# KRISHNA VAMSY GADDAM

+49 176 27890795 • Berlin, Germany
Email | LinkedIn Profile | GitHub

Analytical Master's student in Data Science & Digital Business with hands-on internship experience in data pipeline engineering, business intelligence, and machine learning. Technical proficiency spans SQL, Python, Power BI, and deep learning frameworks. Proven track record of translating complex quantitative metrics into executive-level visual reports, auditing multi-source datasets, and developing real-time analytical systems. Seeking a Working Student role in Data Analysis to leverage data-driven insights for operational decision-making.

## EDUCATION

**GISMA University of Applied Sciences, Germany** | **Master of Science - Data Science, AI and Digital Business** 2025 - Present

- **Relevant Coursework:** Statistics, Applied Algorithms, Data Mining, Distributed Computing, Big Data Systems, Applications of LLMs, Computer Vision, NLP, Advanced Database Concepts, Applied Machine Learning

**KLH University** | **Bachelor of Computer Applications (BCA)** 2022 - 2025

- GPA : 8.59/10
- **Relevant Coursework:** Database Management Systems (DBMS), Data Structures, Mathematics for Computer Science, Web Development using Python, Object-Oriented Programming (OOP), Software Engineering

## PROFESSIONAL EXPERIENCE

**Junior Data Analyst (Intern)** | **Viritus Technologies Pvt Ltd, Hyderabad, India** May 2025 - Sep 2025

- Ingested and transformed 35 GB of unstructured organizational data using Python and SQL, delivering operational insights that contributed to a 7% increase in business profits.
- Built dynamic Power BI dashboards integrating 5 GB of performance data to monitor product usage trends and profit realization.
- Executed data auditing and validation pipelines across multi-source data streams, enhancing overall data quality and consistency by 12%.
- Designed interactive data visualizations using MS Excel and Flourish to present strategic growth recommendations to executive stakeholders.

**Machine Learning Intern** | **Cantilever Labs, Hyderabad, India** June 2024 - Sep 2024

- Developed a real-time face anti-spoofing pipeline using Python, PyTorch, and OpenCV to detect presentation attacks, reducing false authentication risks.
- Engineered the LightFASNet CNN architecture using depthwise separable convolutions and L2 normalization, achieving 97.36% accuracy on standard validation sets.
- Implemented a 30–40 frame sliding-window analysis with majority voting in OpenCV to mitigate live video flickering while evaluating cross-dataset robustness with APCER, BPCER, and ACER metrics (60.71% accuracy).

## SKILLS

**Programming Languages:** Python
**Software Engineering:** Object-Oriented Programming (OOP), SDLC
**BI & Automation:** Microsoft Power BI, Power Query, MS Excel
**Database Systems:** SQL (MySQL), ER Modeling, Data Modeling
**Data & Analytics:** Pandas, NumPy, Exploratory Data Analysis (EDA), Data Cleaning, Data Visualization (Matplotlib, Seaborn), Reporting, Descriptive Statistics
**Tools & Platforms:** Git, Jupyter Notebook, VS Code, Microsoft Office Suite (Excel, Word, PowerPoint)

## ACHIEVEMENTS & LEADERSHIP

**Club President – Student Association (2024–2025):** Spearheaded executive student committees at KLH University, managing event budgets, public relations, and cross-departmental operations.
**Best Coordinator of the Year (2023 & 2024):** Recognized by faculty and leadership for exceptional commitment, operational support, and student activity execution.
**Event Operations Lead:** Managed end-to-end logistics, scheduling, and volunteer teams for major university fests and symposiums hosting **500+ attendees.**
**Technical Paper Presentation:** Awarded 2nd Prize at the National Level Technical Symposium for demonstrating LightFASNet, a lightweight deep learning architecture for real-time face anti-spoofing.

## PROJECTS

**Olist E-Commerce Data Analysis & Insights** | Python, SQL, Pandas

- Queried and analyzed multi-table relational datasets using complex SQL (JOINs, CTEs, aggregations) to evaluate sales metrics and customer retention patterns.
- Identified core revenue drivers across high-volume categories (Bed Bath Table, Health & Beauty) and payment channels, directly informing inventory and merchandising strategy.
- Performed data wrangling and exploratory data analysis (EDA) in Pandas to prepare structured datasets for executive reporting.

**Tech Layoffs & AI Automation Analysis** | Python, Pandas, Seaborn

- Analyzed 1,850 global tech layoff events (2020–2026) in Python, finding AI-driven restructuring rose from 11% to 38% of total job cuts.
- Evaluated 1-week stock price movements, identifying a -2.5% median reaction for AI layoffs versus -1.9% for standard restructurings.
- Built data pipelines to handle missing private firm data, consolidate 49 overlapping categories, and segment companies by size tiers.
- Designed Matplotlib and Seaborn visualization dashboards to communicate layoff trends, timeline spikes, and departmental impacts.

## LANGUAGES & AVAILABILITY

- English – C1 (Advanced)
- German – A1 (Beginner)
- Eligible to work in Germany (Student visa, up to 20 hours per week)
